What is a food allergy?

A food-allergic reaction happens when our body’s immune system, which normally defends us against disease, mistakes a certain food as an invader and attacks it.

What are the top 8 food allergens?

![Top 8 Food Allergens: Milk, Egg, Shellfish, Fish, Tree Nuts, Wheat, Peanut, Soybean](image)

What is cross-contact (cross-contamination)?
Cross-contact happens when one food comes into contact with another food and their proteins mix. As a result, each food then contains small amounts of the other food. For example, cross-contact can happen when the same knife or spoon touches multiple foods without washing it in between.

Food Allergens are not always easy to see in a food, which is why it is important to always read food labels and double-check ingredients before eating foods.
By law, food labels do not have to list allergens that are not direct ingredients in the food, even if they may have touched an allergen during production. However, many producers choose to label for possible allergen contaminations.

What are common food allergy labels?
- May Contain:
- Allergy Information:
- Contains:
- Manufactured on Equipment that Processes:
- Allergy Advice:
- Manufactured in a Plant that Processes:
- Ingredients listed in **Bold** are also allergens

What are 3 things to do if someone is having a reaction?
1. Get help; tell an adult and call 9-1-1 if needed
2. Stay with your friend and watch for symptoms
3. Give medications if needed

What are ways to support someone with food allergy?
1. Know that food allergies are serious
2. Don’t share your food with friends who have food allergies
3. Help educate others who don’t know about allergies and stand up for your friends against allergy bullies!
4. Have fun! Food allergies do not stop someone from participating in, and being GREAT at, sports and the same activities as someone without allergies, as long as things are done safely. If you think your friend with food allergies is being left out, talk to your friend and those around you to help find out how to safely include them.
